WEST COAST ELECTRIC FLEETS

Diamond Lane Partnership Tier

West Coast Electric Fleets is creating a new, more aggressive zero-emission vehicle procurement commitment tier to support and recognize the increasingly ambitious commitments to zero-emission vehicles made by partner fleets over the past year. This *Diamond Lane* procurement commitment allows partner fleets to define their own target that reaches beyond 10% of new vehicle procurement being zero emission vehicles.

Current *Diamond Lane* Partners include:

CALIFORNIA

- State of California – committed to 50% ZEVs for all sedan-class procurements by 2025
- City of Los Angeles – committed to 80% ZEVs for all light-duty vehicle purchases by 2025
- Antelope Valley Transit Authority – 100% of new transit vehicle purchases are ZEVs

OREGON

- City of Portland – committed to 30% ZEVs for all sedan-class procurements by 2030

WASHINGTON

- Washington State Agency Fleets – committed to 20 percent ZEVs for all passenger vehicle procurements by 2017
- City of Seattle – committed to 40% ZEV for the light duty fleet by 2017 and a target of 100% by 2023

BRITISH COLUMBIA

- Geazone, a Victoria-based zero emissions courier business – 100% electric vehicle fleet
- On Sight Equipment, a provider of environmentally sustainable outdoors and travel products – committed to a 100% electric vehicle fleet
- ElectraMeccanica, a manufacturer of electric commuter vehicles – committed to a 100% electric vehicle fleet
- Greener Print, a Vancouver-based provider of sustainable printing and design services – committed to 100% of fleet purchases being electric
- ELIX Wireless Charging Systems, a Vancouver-based provider of innovative wireless charging technologies – committed to 75% ZEVs for all vehicle procurement

West Coast Electric Fleets and the Pacific Coast Collaborative commend these fleets for their commitment to cleaner air in their communities and a healthier climate for future generations. Over the coming year, West Coast Electric Fleets will continue to serve as a platform for its nearly fifty partner fleets (and growing) to share best practices for adopting zero emission vehicles. West Coast Electric Fleets feels fortunate to have these *Diamond Lane* fleets paving the way for more zero emissions vehicles on roads across the West Coast and North America.

If your organization is interested in joining/upgrading to the *Diamond Lane* please [click here](#) and fill out this quick online commitment form.
